

Four new appliances which thanks to their advanced design provide easy of use, economic function and attractive appearance. Their speciality in design to remove spits and can be put again by opening a door allows easier load-unload and also they are easily cleaned. In every spit we can put 6-7 chicken, lamp or pig. Such as the other chicken grills of SER GAS, have a grease – collector in which the user puts some water to reduce the smoke of grease that dribbles. Finally, the big surface of glass and the inner light makes these appliances impressive in appearance.
