

Q-SERIES

THE Q-SERIES IS THE STRONG SILENT TYPE

With the development of the Q-Series sound reduction technology, Blendtec continues to deliver the same industry leading performance with a reduction of roughly half of the audible sound associated with normal blender operations.

Standard Features

- POWER**
 - Available in 13, 15, or 20 amp models
 - Direct-drive motor
- CONTROLS**
 - No-Tend™ touchpad controls
 - 30 pre-programmed blend cycles to choose
 - Blue LCD display shows count cycle
 - Solid state electronics
- VORTEX**
 - Two 64oz. jars included
 - Milkshake blade on 64 oz. jar available
 - 96 oz. five-sided, high efficiency jar available
- CUSTOMIZE**
 - Custom jar graphics available
 - Program your own blend cycles from your computer
- QUIET**
 - Q Series™ sound enclosure design reduces sound up to 50 percent

Additional Options

- DISPENSE**
 - Combine with our D8 dispenser machine for a total solution

MKT-CE-BR-081 Brochure, Q-Series Rev 03 Jan 08

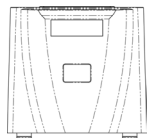

Q-Series Component Overview

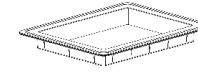

- Sleek sound enclosure with a low profile that incorporates sound reduction technology*

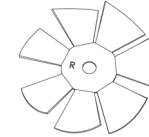

- Jar design reduces the sound associated with jar operations and delivers improved overall performance and durability. New jars come with a one year warranty*

- Motor stand incorporates sound reduction baffles to dampen sound

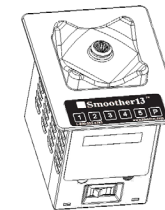

- Vibration dampening gasket reduces sound generated between blending platform and motor stand

- Breakthrough fan design delivers sound reduction technology while improving motor air flow and cooling capacity

- For in-counter models the gel gasket not only dampens the vibration between the counter and sound enclosure, but also prevents spills from entering the motor area*

- The shape of the stainless steel blending platform dampens sound and drains liquid away from the blender motor

*These Q-Series sound components can be utilized with existing Smoother, SpaceSaver and ABC models. The simple upgrade to Q-Series components does not require special tools, and only takes a few minutes to make the conversion.
